13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. proposes to remove the bridge plug and downhole commingle production from the Basin Fruitland Coal and the Twin Mounds Pictured Cliffs in the Ropco 8 #2. Allocations are based on production and have been allocated as follows:

Fruitland Coal	Gas: 61%	Water: 68%	Oil: 0%
Pictured Cliffs	Gas: 39%	Water: 32%	Oil: 100%

Revised Water
Allocation

Ownership is diverse & owners were notified via certified, return receipt mail on 2/26/09. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights. The pools are in the NMOC pre-approved pool combinations for DHC in the SJ Basin and the NMOC was notified of our intent to DHC via submission of Form C103 on 3/18/09.
