- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. proposes to remove the packer and downhole commingle production from the So. Blanco PC (72439), the Otero Chacra (82329), the Blanco Mesaverde (72319) and the Basin Dakota (71599). Allocations are based on the attached production and have been allocated as follows:

Pictured Cliffs:	Gas: 18%	Oil: 0%	Water: 0%
Chacra:	Gas: 8%	Oil: 0%	Water: 0%
Mesaverde:	Gas: 41%	Oil: 34%	Water: 34%
Dakota:	Gas: 33%	Oil: 66%	Water: 66%

Interests are common in all zones; subsequently, there are no owners to notify of our intent to DHC. The NMCD has been notified of our intent to DHC by submission of form C107A on 4/15/09. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights.
