13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to severe loss of circulation while drilling through the coal interval we have proposed to change our drilling plan as follows:

1. Set an isolation plug to stop the loss of circulation in our current 8-3/4" hole at our current depth of approx. 3625'.
2. Regain circulation above the isolation plug.
3. Set & cement our 7" casing approx. 3550' to 3600' bring cement to surface.
4. Drill out with air or air/mist or nitrogen and drill the 6-1/4" hole to planned TD of 6233'.
5. Run and cement the 4-1/2" casing.
6. Run a cement bond log to evaluate the top of cement.
7. If the required isolation is not achieved, remedial cementing would be done to achieve the required isolation.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #25825 verified by the BLM Well Information System  
For CONOCOPHILLIPS COMPANY, sent to the Farmington  
Committed to AFMSS for processing by ADRIENNE GARCIA on 12/10/2003 (04AXG1912SE)
