13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well was returned to production in early November 2003. It produced about 25 MCFD average for the month of November. The well had made up to 300 MCFD, but developed an inflow problem. We pumped a treatment that appears to have solved the inflow problem, and the gas production is steady, or possibly increasing.
