13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The San Juan 30-4 #105st will be abandoned down to 2890' TVD by pumping two glass "G" cement plugs; one plug will be from the deepest point in the well that can be safely accessed 1700' (MD) and be 200' long,

the second plug will be from 1100' to 900' MD.

A 6 1/4" hole will be milled in the casing at 500' MD and a second sidetrack will be drilled to connect with the original sidetrack between 2890' and 3650' TVD. If the second sidetrack has not encountered the original sidetrack by 3650' TVD it will be abandoned with two class "G" plugs from 3600 - 3400 and 2400' - 2200'.

The second sidetrack will be cased with 4 1/2" 11.6 # J-55 and cemented with a 20% excess to surface using the same slurry design as the original sidetrack.

Verbal approval given by Jim Lavatto on 5/06/09.
