XTO Energy Inc. proposes to amend surface commingle order PC-922 for subject wells. The Schwerdtfeger A #2 is a S. Blanco Pictured Cliffs well & the Schwerdtfeger A #15 was a Blanco Mesaverde well. The Schwerdtfeger A #15 has recently been recompleat in the Otero Chacra formation and is in the process of obtaining downhole commingling approval to commingle the Chacra and Mesaverde formations. The Schwerdtfeger A #2 production is on a stabilized decline. It is proposed to modify the current commingle order by testing the Schwerdtfeger A #2 on a six month basis by shutting in the Schwerdtfeger A #15 while a stabilized production rate is obtained on the A #2. The resulting production rate will be assigned to the Schwerdtfeger A #2 and the remaining volume will be assigned to the Schwerdtfeger A #15.

- Please not by this office when the Otero Chacra and the Blanco Mesaverde are downhole commingled

14. I hereby certify that the foregoing is true and correct.
