13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Energen TA'd the above well (See NOI dated 8/16/2009 from Energen)

The well was TA as follows:

Work from 10/8 to 10/12/2009

1. A 5-1/2" casing plug set 4,052' - top of Fruitland @ 3,930'

2. The well was loaded with an inhibited packer fluid and the casing was tested to 540 psig for 30 minutes with no more than 10% pressure loss. (See attached Chart - both BLM and NMOCd notified no witness for either agency - told to proceed by agency's.)

3. A 2-3/8" kill string was left in the well and a master valve on the tubing head - all casing sidelolet valves left in place with bull plugs and the well is totally disconnected from any lines.

4. Energen will annually update on the status of the 80 Acre infill and will submit a subsequent report either requesting a continued status of TA. If a change of status is needed to producing (i.e. 80 Acre infill approved) or to plug and abandon the well Energen will submit a NOI.

5. The casing pressure test is good for 5 years - at which point if the well is still not activated another casing MIT will have to be performed on the well.
