13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplection in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Operator plans to evaluate and possibly complete the Fruitland Coal in this well. The well is completed in the Gallup. Plan to set a bridge plug below the existing Fruitland Coal interval. A cement-bond-log will be run over the coal interval to evaluate cement integrity. The casing will be pressure tested. Should it be determined that the Fruitland Coal can be completed, an application will be submitted to seek approval of the procedure. If it is determined that the Fruitland Coal can not be adequately completed, an application to plug the well will be submitted.

ROVD NOV 3 '09

The operator has submitted an APD to drill an offsetting Fruitland Coal well. The procedure above will be completed prior to that application being fully considered by the BLM.
