### Release Notification and Corrective Action

#### OPERATOR

X Initial Report ☐ Final Report

Name of Company: Energen Resources, Inc.	Contact: Ed Hasely	
Address: 2010 Afton Place, Farmington, NM 87401	Telephone No: 505-324-4131	
Facility Name: Jicarilla 94 #2A (API # - 3003921484)	Facility Type: Oil/Gas Well Site	
Surface Owner: Jicarilla Apache Tribe	Mineral Owner: Jicarilla Apache Tribe	Lease No. Jicarilla Apache 94

#### LOCATION OF RELEASE

Unit Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
D	27	27N	3W	990	North	1190	West	Rio Arriba

Latitude 36.5488

Longitude -107.13669

#### NATURE OF RELEASE

Type of Release: Condensate	Volume of Release: 105 bbls - Condensate	Volume Recovered: 0 bbls
Source of Release: Condensate Tank	Date and Hour of Occurrence: 1/3/09	Date and Hour of Discovery: 1/3/09
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Bryce Hammond - Jicarilla Oil and Gas; Brandon Powell - NMOCD (message)	
By Whom? Billy Stalcup / Ed Hasely	Date and Hour: 1/3/09 3:30 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. NA	

RCVD JAN 8 '09

If a Watercourse was Impacted, Describe Fully.\* NA

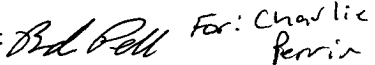

OIL CONS. DIV.  
DIST. 3

#### Describe Cause of Problem and Remedial Action Taken.\*

A dozer operator hit the drain line running from the condensate tank to the water pit tank causing the valve on the condensate tank to break. This allowed the contents of the condensate tank to leak out into the bermed area. All fluids were contained inside the bermed area, but no liquids were recovered.

**Describe Area Affected and Cleanup Action Taken.\*** Plans are to move the tank so that the soil around and beneath the equipment can be removed if necessary. Impacted soils will be excavated and transported to a commercial disposal facility. Once the soil is removed, samples will be collected from the excavation and sent to a laboratory for analysis. Upon verification that the samples are below the 100 ppm TPH, the excavation will be backfilled with clean soil. A final report, including the lab analyses, will be submitted upon completion of the cleanup work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
