If a Watercourse was Impacted, Describe Fully.*										
Describe Cause of Problem and Remedial Action Taken.* On September 11, 2009, the separator dump valve hung open causing the fluids to go to the water pit tank. As a result the water pit tank overflowed. All fluid was contained within the berm. The well was shut in and a vacuum truck was used to recover the fluid.										
Describe Area Affected and Cleanup Action Taken.* All fluid was contained within the berm. A vacuum truck was called to										
location and recovered 100 BBLS produced water and oil. The surface equipment will be removed in the area of the										
spill & the impacted soil will be excavated & disposed of properly.										
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and										
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability										
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health										
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other										
federal, state, or local laws and/or regulations.
