NATURE OF RELEASE

Type of Release – Crude Oil	Volume of Release – 200.4 BBL Crude Oil	Volume Recovered – 0 BBL
Source of Release: Drain valve on production tank froze & broke apart.	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 2/5/09 – 3:45 p.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? OCD - Brandon Powell via phone call	
By Whom? Gwen Frost	Date and Hour – 2/06/09 – 9:00 a.m.	RCVD APR 29 '09
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. OIL CONS. DIV.	
If a Watercourse was Impacted, Describe Fully.* DIST. 3		

Describe Cause of Problem and Remedial Action Taken.* **On February 5, 2009, Three Rivers Trucking discovered a release of approximately 200.4 BBL of crude oil that was released into the berm area & onto location. None of the fluids were recoverable. The release was the result of a frozen water drain valve on the production tank due to freezing temperatures, breaking the valve and allowing a release to occur. Upon discovery, the well was shut in & COPC was notified. Calder Services cleared the location of the equipment & M&M Trucking completed the excavation. Envirotech completed the conformation sampling for clean closure at the site (report attached).**

Describe Area Affected and Cleanup Action Taken.* **All of the spilled fluids remained on location. The spill impacted soil on the ground surface in and outside of the berm. The production tank was removed and affected soils were excavated. To prevent reoccurrence, COPC will continue to perform tank inspections.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
