Describe Cause of Problem and Remedial Action Taken.\* **On December 9, 2009, the oil tank began to overflow as a result of the separator malfunctioning which in turn caused all fluids to enter the production tank. Upon discovery, the well was shut in.**

Describe Area Affected and Cleanup Action Taken.\* **All fluid was contained within the berm. Approximately 20 BBLS of fluid was recovered. COPC will excavate the impacted soil and complete confirmation sampling.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
