13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 9/9/03 BP America Production Company filed a Notice of Intent to downhole commingle above mentioned well. The proposed allocation of production was based on a fixed percent using the production rate from an offset well (GCU 72). At this time we respectfully request a change to that allocation method.

After conversation with Joe Hewitt on 10/27/03 we have decided the allocation will be based on original gas in place. Our calculated OGIP is as follows:
Basin Fruitland Coal = 516 mmscf & Kutz Pictured Cliffs, West = 480 mmscf.

Therefore the allocation will be 51% to Basin Fruitland Coal & 48.2% to Kutz Pictured Cliffs, West.
