Was a Watercourse Reached? <input type="checkbox"/> Yes <b>X No</b>	If YES, Volume Impacting the Watercourse. <b>N/A</b>	

If a Watercourse was Impacted, Describe Fully.\*  
**A watercourse was not reached.**

Describe Cause of Problem and Remedial Action Taken.\*  
**The cause of this spill is a hole in the piping between the separator and the tank. External corrosion caused the hole due to poor pipe wrap. None of the leak left the bermed area. Key Energy sucked up the water approx. 80 bbls and we are estimating that another \* 40+ bbls will be removed once the ice thaws. See attached diagram and pictures.**

Describe Area Affected and Cleanup Action Taken.\*

**Spilled produced water did not leave location, and once the rest of the water thaws and is sucked up and hauled off, no further action was taken to remediate.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
