If a Watercourse was Impacted, Describe Fully.

Describe Cause of Problem and Remedial Action Taken.

**Well was brought back on after being shut in. There is a water pump installed on location that pumps water to the Rosa 94 disposal. The water pump malfunctioned letting the tank reach capacity and releasing 30 Barrels into the berm. Contained within secondary containment and on location. Well shutin until tank and containment drained.**

Describe Area Affected and Cleanup Action Taken.

**Recovered water with vac. truck. Repaired pump and monitor for proper function. Saturated soil conditions (inclement weather) likely to prevent significant produced water impact. As well pad and containment to be sterilized during production life of well, will reclaim when well P&A'd. No further action being taken at this time.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
