NATURE OF RELEASE

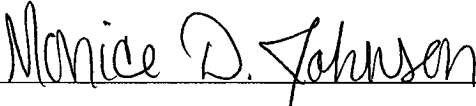

Type of Release – Frac water (corrosion inhibitor, soap, foamer) & produced oil	Volume of Release – 1 BBL	Volume Recovered – none
Source of Release: Blooiie line	Date and Hour of Occurrence 6/7/07	Date and Hour of Discovery 6/7/07
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell – OCD – via phone (6/8) and email Richard Gallegos–State Land Office–via phone (6/8) and email	
By Whom? Ed Hasely (phone) / Monica Johnson (written)	Date and Hour – 6/8/07 (phone) & 6/14/07 – 5:00 p.m. (written)	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* **A spill occurred at the Johnston A Com G #17N on 6/7/07. The spill is estimated to be less than 1 BBL frac water (with corrosion inhibitor, soap, foamer) and a small amount of produced oil. The spill was from overspray from the blooiie line to the flare pit due to there not being enough gas to flare the gas and fluids, and windy conditions preventing the pilot from lighting, thus causing the overspray. The spill sprayed off location in a fine mist impacting adjacent soils, brush, and trees from 80 to 100 feet off location.**

Describe Area Affected and Cleanup Action Taken.* **The spill sprayed off location in a fine mist impacting adjacent soils, brush, and trees from 80 to 100 feet off location. For remediation, the brush and trees will be sprayed with water and allowed to drip onto absorbent pads which will then be properly disposed of offsite. The impacted soils will be raked.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
