By Whom?	Matthew L. Pride	Date and Hour	1/9/07, 5:10 pm		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	RCUD MAR12'07 OIL CONS. DIV. DIST. 3		
If a Watercourse was Impacted, Describe Fully *	NA				
Describe Cause of Problem and Remedial Action Taken.* A valve froze at the separator Field personnel have been informed to monitor separators daily and to take the necessary steps to prevent valves from freezing					
Describe Area Affected and Cleanup Action Taken.* Oil was contained within the firewall. The oil was picked up by vac. Truck and put back into the oil tank. Any contaminated soil will be excavated until remaining soils fall below the NMOCD remediation level of 1,000 ppm of petroleum hydrocarbons (TPH). Upon NMOCD approval, the excavated soil will be properly disposed of at an off-site disposal.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
