NATURE OF RELEASE OIL CONS. DIV.									
		duced wate				elease – 11 BBL	Volume Recovered – 10 BBL		
Source of Release: Produced water tank overfilling								Date and Hour of Discovery 4/17/07 – 1:00 p.m.	
Was Immedia	ate Notice	Given?				If YES, To Whom?			
☐ Yes ☐ No ☒ Not Required					Brandon Powell – OCD – via phone and email				
					Mark Kelly – BLM – via email				
					Marvin Huntley – BLM – on location during recovery				
By Whom? Monica D. Johnson						Date and Hour – 4/18/07 – 2:00 p.m.			
Was a Watercourse Reached?					If YES, Volume Impacting the Watercourse.				
☐ Yes ☑ No If a Watercourse was Impacted, Describe Fully.*									
a tank battery, which is 1/10 mile east of the Lewis Park #101, on 4/17/07 due to the produced water tank overfilling. The tank battery collects produced water from the San Juan 32-7 Unit #227 and #227A (which are about 2 miles away from the tank battery). The tank overfilled due to the #227A producing more water than expected after the pumping unit was down for a clutch repair and then made above normal water production after it was brought back on. All fluids remained within the bermed area and 10 BBL were recovered by vacuum truck.									
Describe Area Affected and Cleanup Action Taken.* All fluids remained within the bermed area and 10 BBL were recovered by vacuum truck. For remediation of the remaining impacted soils, the soil was raked and oil gator was applied. Marvin Huntley with the BLM was present on location during the recovery of the fluids.									
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
