Latitude 36.65667° Longitude 107.53042°

NATURE OF RELEASE

Type of Release – Condensate	Volume of Release – 7 BBL	Volume Recovered – 5 BBL
Source of Release: Open valve	Date and Hour of Occurrence 3/13/06 – 12:55 p.m.	Date and Hour of Discovery 3/13/06 – 1:00 p.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Denny Foust – OCD – via email Mark Kelly – BLM – via email	
By Whom? Monica D. Johnson	Date and Hour – 3/15/06 – 2:30 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.* **A condensate spill of approximately 7 BBL occurred at the San Juan 28-7 Unit #56 on 3/13/06, due to a valve being left open. A Foutz & Bursum crew was changing out the standard ball valves with non-freeze valves on the load line and drain line of the condensate tank. In order to change out the valves, the condensate in the tank was temporarily transferred to a truck. After the valves were changed out, the truck was hooked up to the drain line and started to transfer the condensate back into the tank. However, the load line valve on the other side of the tank was left open and approximately 7 BBL condensate spilled to the bermed area before they noticed the open valve. All spilled fluids remained within the bermed area.**

Describe Area Affected and Cleanup Action Taken.* **All spilled fluids remained within the bermed area and 5 BBL of the 7 BBL spilled were recovered. The location was assessed for any impacts to the soils, with none being found.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
