DIST. 3

Describe Cause of Problem and Remedial Action Taken.*

This is a new well that was brought on line on July 19, 2007. The volume of produced water was not anticipated and the water tank overfilled spilling approximately 30 bbls of produced water into the bermed area. Approximately 20 bbls were recovered and returned to the storage tank

Describe Area Affected and Cleanup Action Taken.*

The area affected will be allowed to dry. The soils will be raked to facilitate the drying process.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
