Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RCVD DEC 12 '07

OIL CONS. DIV.
DIST. 3

Describe Cause of Problem and Remedial Action Taken * **XTO Energy lease operator arrived on location and discovered a leak from the production tank. Upon inspection it was discovered that the drain valve on the production tank had frozen overnight and broke upon warming. Approximately 3 barrels of oil was released onto the ground within the tank berm and 5 barrels into the pit tank. The well was immediately shut in. A vacuum truck was dispatched to recover any standing oil and a roustabout crew began clean up.**

Describe Area Affected and Cleanup Action Taken.* **Upon discovery of the release the well was immediately shut in and clean up began. A vac truck was dispatched and recovered approximately 2 barrels of oil from with the tank berm. The valve was removed and replaced with a non freeze valve. An estimated 4 yards of contaminated soil was excavated and disposed of at a licensed facility.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
