If a Watercourse was Impacted, Describe Fully.*
None

Describe Cause of Problem and Remedial Action Taken.*
The seal on the equalizing lines between two storage tanks leaked at the connections after the tanks were equalized. The connections were intact at time of visit but not tighten enough to hold hydrostatic pressure of water in tank after equalization of tanks. Soils will be raked to promote evaporation.

Describe Area Affected and Cleanup Action Taken.*
Area within the containment berm was saturated. The water was contained inside berm and was recovered to the extent possible. Soil will be rake to the extent practical to promote evaporation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
