OIL CONS. DIV.
DIST. 3

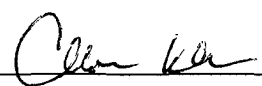

Describe Cause of Problem and Remedial Action Taken.*

1" dump line from dehydrator froze and split. 1" check valve on line failed and 2" check valve on tank failed. liquid flowed back from tank. liquid was out side firewall but on location. Called vacuum truck to recover oil on ground.

Describe Area Affected and Cleanup Action Taken.*

There is a area 10' wide x 90' long where liquid pooled. liquid was sucked up and returned to tank. holes were dug to check spread of oil, holes slowly filled with drip, and were sucked dry with vacuum truck.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
