OIL CONG. DIV.

DIST. 3

Describe Cause of Problem and Remedial Action Taken.\*  
The water transfer pump froze and broke allowing 15 bbls of Fruitland Coal produced water to leak into the bermed area.

Describe Area Affected and Cleanup Action Taken.\*  
All liquids were contained inside the tank berms. A vacuum truck was used to recover the free standing liquids. The impacted soils will be raked to break up any crust that may form.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
