NATURE OF RELEASE

Type of Release: Gas - Fire	Volume of Release: N/A	Volume Recovered: N/A
Source of Release; Seal on screw compressor	Date and Hour of Occurrence 1/25/2006 5:30 PM	Date and Hour of Discovery 1/25/2006 5:30 PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Charlie Perrin	
By Whom? Kevin Hansford and Don Brooks	Date and Hour 1/26/2006 8:30 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* When Hanover mechanic arrived on location he noticed a small flame coming out of the front seal on the screw compressor. The pill block had broken, causing the coupler to rub on guard and generating heat. The seal had a small amount of gas leaking, which was ignited by the heat on the coupling. We have asked the compression companies to look at a better guard design to prevent the rubbing should another pill block break.		
Describe Area Affected and Cleanup Action Taken.* No cleanup necessary.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
