Release Notification and Corrective Action

30039 25466

OPERATOR

☒ Initial Report ☐ Final Report

Name of Company BP	Contact Brittany Benko
Address 200 Energy Court, Farmington, NM 87401	Telephone No. (505) 326-9235
Facility Name Carracas Canyon Unit 34-B9	Facility Type Well site

Surface Owner Forest Service	Mineral Owner BLM	Lease No. 678696
-------------------------------------	--------------------------	-------------------------

LOCATION OF RELEASE

Unit Letter I	Section 34	Township 32N	Range 4W	Feet from the	North/South Line	Feet from the	East/West Line	County Rio Arriba
-------------------------	----------------------	------------------------	--------------------	---------------	------------------	---------------	----------------	-----------------------------

NATURE OF RELEASE

Type of Release Produced Water from a gathering line	Volume of Release 50 bbls	Volume Recovered 40 bbls
Source of Release Produced Water Gathering Line	Date and Hour of Occurrence	Date and Hour of Discovery 07/13/2001 4:30 pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Henry Villeneuve	
By Whom? Greg Nelson	Date and Hour 07/13/2001 5:00 pm	
Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. About 40 bbls	

If a Watercourse was Impacted, Describe Fully.*

The produced water from the leak in the gathering line, traveled down a dry drainage to a stock pond located about 30 feet off of the well pad. The produced water accumulated in the stock pond. Upon discovery, a water sample was taken and the pond was drained. The water is currently being tested to determine if the top layer of soil in the bottom of the pond will need to be removed. The cattails in the pond do not appear to have suffered any damage.

Describe Cause of Problem and Remedial Action Taken.* The cause of the gathering line leak is still being investigated. A vactron was used to uncover the pipe and the pipe is currently being inspected. Past incidents in Carracas, indicate that the piping was installed incorrectly resulting in damage by rocks. We are still trying to determine if that is the cases in this incident.

Describe Area Affected and Cleanup Action Taken.*

The produced water and other water in the stock pond was drained and tests are being performed on a water sample to determine if a layer of soil should be removed from the bottom of the pond.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
