Release Notification and Corrective Action

30 045 22148

OPERATOR

☐ Initial Report ☐ Final Report

Name of Company BP (Amoco Production Company)	Contact Brittany Benko
Address 200 Energy Court Farmington, NM 87401	Telephone No. (505) 326-9235
Facility Name Riddle 2A	Facility Type Wellsite

Surface Owner BLM	Mineral Owner BLM	Lease No. NMSF080244
--------------------------	--------------------------	-----------------------------

LOCATION OF RELEASE

Unit Letter J	Section 17	Township 30N	Range 9W	Feet from the	North/South Line	Feet from the	East/West Line	County San Juan County
-------------------------	----------------------	------------------------	--------------------	---------------	------------------	---------------	----------------	----------------------------------

NATURE OF RELEASE

Type of Release 4% KCl Water	Volume of Release 200 bbls	Volume Recovered
Source of Release Frac Tank	Date and Hour of Occurrence The evening of 10/23 or early morning of 10/24	Date and Hour of Discovery 10/24/2001 7:15am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Charlie Perrin	
By Whom? Brittany Benko	Date and Hour 10/24/2001 11:15am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A leak was discovered from a Frac Tank on the Riddle 2A when the rig crew arrived on location and discovered a significant amount of water pooling on the location. All Frac Tanks were checked the day before and there was no indication of a leak. It appeared that the leak sprung overnight and was a result of corrosion of a portion of the bottom of the tank. A water hauling truck was dispatched to drain the tank and another tank was brought onto the location as a replacement.

Describe Area Affected and Cleanup Action Taken.*

None of the 4% KCl water left the location/wellpad. The contaminated soil is being landfarmed on site.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: Riddle #2A 4% KCl Water spill, Lease NMSF080244

Dear Mr. Kelly,

Confirming my phone call to you on Thursday, October 25, 2001 at 9:00am, a spill of 200 barrels of 4% KCl water occurred at the Riddle #2A, a wellsite in Unit J, Section 17 T30N-R9W. The spill was discovered at 7:15 am on October 24, 2001. A Frac tank on location began leaking the night before as a result of corrosion of a portion of the bottom of the tank. A water hauling truck was dispatched to drain the tank and another tank was brought onto the location as a replacement. None of the 200 barrels of 4% KCl left the wellpad. The contaminated soil is being landfarmed on site.

Should you have any additional questions, please feel free to contact either Brittany Benko at 326-9235 or Buddy Shaw at 326-9219 in our Farmington office.

Sincerely,

Brittany Benko
Environmental Coordinator
