Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.

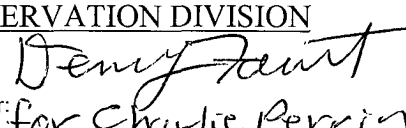

Describe Cause of Problem and Remedial Action Taken.

Fiberglass BGT failed and released water to outer plastic liner. Reported as a possible release pending tank removal and site assessment. Removal operations initiated on 8/18/05 found small hole in plastic liner. Soils contaminated with produced water and incidental oil removed and transported to IEL landfarm. Soil sample taken from excavation bottom at ~10 feet bgs. Clean soil replaced and new double wall/bottom steel tank installed. Lab results indicate impacted soils removed (see attached lab).

Describe Area Affected and Cleanup Action Taken.

Tank pumped upon discovery. Tank removed and replaced.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
