Well No. Navajo #2 is located 1830 ft. from $\left\{ \begin{smallmatrix} N \\ S \end{smallmatrix} \right\}$ line and 700 ft. from $\left\{ \begin{smallmatrix} E \\ W \end{smallmatrix} \right\}$ line of sec. 22

NE $\frac{1}{4}$ Section 22 18 North, 4 West N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wildcat Sandoval, New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6340 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well was cemented from 1370' to 1040' and 50 lbs lead wool tamped on top of cement. Water above 1040' tested and found not potable.

Well was plugged 1040' to 900', 50' in the 5 1/2" pipe, with 95 sacks of cement. Bridge was set in pipe 20' from the surface and pipe was filled with cement. A 2" pipe was set in the cement inside of the 5 1/2" casing. This will hold the sign designating the number of the well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
