13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

On 11/4/2010 WGR plans to re-perforate the existing Entrada zone using deeper penetrating charges with larger entrance holes. The previously approved injection zone from 6,352 ft to 6,490 ft (138 ft total) will be re-perforated at a shot density of 6 spf (828 total holes). These holes are in addition to the existing 628 perforations. The Entrada zone will have a total of 1,456 holes.

Afterwards, a 24 hour injection test with subsequent 48 hour Falloff test will be performed to ascertain perforation performance and well injectivity.
