13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Wellbore has been previously planned for plugging and abandonment. Additional wellbore integrity evaluation shows possible indications of tubing leak(s) preventing plunger from cycling and/or possible scale deposition on perforations thus preventing gas production from Dakota perforations. This wellbore was scheduled for abandonment in the third quarter of 2010, however, with additional wellbore data, it is believed additional wellbore remedial work should be performed to make sure there are no tubing leaks and/or scaled off casing perforations opposite previously productive Dakota perforations.

We have rescheduled a workover rig that is approved for work on tribal lands and they have scheduled Kimbell a window at the end of May 2011 to conduct this work for us. We plan to remove the tubing from the well and inspect and/or replace all tubing, then clean out the wellbore to plug back total depth, pressure test all casing above Dakota production perforations, and then flow, swab or plunger lift well to test. If well proves economic, it will be immediately returned to producing status, if testing proves uneconomic, we will submit a Plugging and abandonment immediately for approval to commence and complete wellbore plugging prior to the end of the year, if logistically possible.

14. I hereby certify that the foregoing is true and correct.
