Do not wash pumps and lines. Week pumps and lines.	
2. Wash pumps and lines.	
3. Reverse out	
4. Run Blend Test on Cement	
5. Record Rate, Pressure, and Density on 3.5" disk	
6. Confirm densitometer with pressurized mud scales	
7. 1" cement to surface if cement is not circulated.	
If cement is not circulated to surface, run temp. survey 10-12 hr. after landing plug.	
Notes: *Do not wash up on top of plug. Wash lines before displacing production cement job to minmize drillout.	
be not mash up on top of plag. Wash lines solve displaying production content job to himmings dislibut.
