If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The above mentioned well is currently being used to monitor pressure in the PC formation & in TA status.

It is BP's concern; not to prematurely P&A this wellbore.

BP anticipates being able to use this well for Fruitland Coal pressure monitoring to better understand connectivity and depletion of the upper coal seams and apply that knowledge to other parts of the field.

Currently BP has a well surveillance program in San Juan North and hopes to bring this well into the program. However, this isn't possible until late 2012.

*When OED TA expires will require MIT to DRK Perfs.*
