If a Watercourse was Impacted, Describe Fully.* None					
Describe Cause of Problem and Remedial Action Taken.* Lease operator left valve open on separator. Water dumped to water drain pit from separator. Water drain pit over filled. The standing water was recovered and the area allowed to dry. The soil was raked to promote evaporation. Further remediation was determined not necessary based on the absence of mineral staining after the soils dried. Valve was closed and operation of separator tested to be satisfactory.					
Describe Area Affected and Cleanup Action Taken.* Area on location within berm containment and adjacent to water storage tank depression.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
