If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A bobtail water truck unloaded into our disposal tank and left the valve open to run onto the ground and spill a 2'x4' area at side of tank. They disconnected hose and drove off with out closing their cap, splattering oil from tank to gate, aprox. 3/4 mile. We then picked up the oil by hand and removed from the snow, before the oil touched the dirt.

Describe Area Affected and Cleanup Action Taken.*

The area affected was a 2x4' area at side of tank, the road leading from the tank to yellow gate and a 12-14" circle at the gate. After picking up the oil by hand, we transferred to our remediation soil area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
