NATURE OF RELEASE

Type of Release	Condensate inside of fully contained production tank Berms/walls.	Volume of Release	183.06 Bbls.	Volume Recovered	0.0 Bbls.
Source of Release	Failed production tank valve. (Valve froze and split with accumulated fresh water inside valve)	Date and Hour of Occurrence	January 12, 2006, Unknown	Date and Hour of Discovery	January 12, 2006 @ 1630 HRS MST
Was Immediate Notice Given?	Within 24 Hours XX Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Mr. Charles Perrin, NMOCD, District #3, Aztec, NM @ 1157 Hrs MST		
By Whom?	Jonathan M. Stickland	Date and Hour	January 13, 2006 @ 1157 Hrs. MST		
Was a Watercourse Reached?	All condensate was contained within bermed/walled area around tanks <input type="checkbox"/> Yes XX No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

NOT APPLICABLE : NO CONDENSATE LEFT CONTAINED AREA AROUND PRODUCTION TANKS

Describe Cause of Problem and Remedial Action Taken.\*

Production separator water dump valve froze allowing produced water and condensate to be dumped and stored in condensate production storage tank (State Tank # 1751). Load line valve located approximately 6" from tank body accumulated fresh water inside it and froze. Expansion of frozen water caused material failure in valve body allowing stored condensate in tank to leak into confined area, inside tank walls/Berms. Envirotech, Farmington, NM has been called to location (on location 1/17/2006) to evaluate nature and extent of area effected and will conduct testing and provide analysis and recommendation to remediate area effected.

Describe Area Affected and Cleanup Action Taken.\*

Currently evaluating and testing affected area. No recommendations/requirements established as of this initial notification as to remediation required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
