If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* **A produced water spill of no more than 50 BBL was discovered on 12/8/04 by the lease operator. The leak appeared to be coming from the bottom of the produced water "B" tank or the associated piping to the tank. All of the water was contained within the bermed area. A vacuum truck was called and hauled 40 BBL of water out of the berm. The well was shut in until repairs are made to the tank and berm.**

Describe Area Affected and Cleanup Action Taken.\* **No water left the berm. A vacuum truck recovered 40 BBL of 50 BBL of the produced water spilled. Any remaining stained soil within the berm will be raked and excavated, if necessary. Unless remediation activities show otherwise, this will be the final report.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
