If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* The drain valve on the condensate tank froze. The frozen valve burst allowing the contents of the tank to escape. At the time of discovery the condensate had already soaked into the soil. The contaminated soil was land farmed onsite and remediated to levels consistent with the guidelines determined by the OCD. (see attached lab reports)

Describe Area Affected and Cleanup Action Taken.*

The area affected by the spill includes the bermed area and a 10 by 50 foot area outside the containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
