If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* A valve froze and eventually burst, allowing water to be released. The broken valve has been replaced. At this time remedial action is not possible due to the amount of mud on location. (Mud was not caused by the release)

Describe Area Affected and Cleanup Action Taken.\* The areas impacted by the spill include the dike area around the water tank and a small area outside of the dike. (The spill stayed on location.)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
