Describe Cause of Problem and Remedial Action Taken.\*  
An unknown person closed the 2" ball valve and opened a 1" bleeder valve on the pumping well. Fruitland Coal produced water was pumped out of the opened bleeder valve onto location. The operator was on location two days prior and all was working OK. Suspect intentional foul play.

Describe Area Affected and Cleanup Action Taken.\*  
The water soaked into the ground on location. If needed, the area will be raked upon drying to break up any crust that may form.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
