Release Notification and Corrective Action

30 045 27448

OPERATOR

☒ Initial Report ☒ Final Report

Name of Company Compressor Systems Inc.	Contact <input type="checkbox"/> Charles R. Viverette Jr.	
Address P.O. Box 60760 Midland, Texas 79711-0760	Telephone No. <input type="checkbox"/> 432-495-3169	
Facility Name Devon Energy Corporation's NEBU # 459 Facility	Facility Type <input type="checkbox"/> natural gas compression	
Surface Owner Federal	Mineral Owner	Lease No. <input type="checkbox"/>

LOCATION OF RELEASE

Unit Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
	19	31N	7W	2,505	North	1,810	East	San Juan

NATURE OF RELEASE

Type of Release Screw Compressor Oil	Volume of Release 300 Gallons	Volume Recovered <input type="checkbox"/> 180 Gallons
Source of Release Compressor Input Shaft	Date and Hour of Occurrence April 8, 2004 / 2:00 p.m.	Date and Hour of Discovery <input type="checkbox"/> April 8, 2004 / 3:00 p.m.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom? <input type="checkbox"/>	Date and Hour <input type="checkbox"/>	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The seal failed on the screw compressor input shaft. The faulty seal was then replaced.

Describe Area Affected and Cleanup Action Taken.*The area affected was limited to the pad and was 100 yards by 20 yards in size. A dirt dike was built up to keep any fluid from running off the pad. The remedial action was to contain the spill on the ground, suck up the puddled oil off the ground and skid, and place oil soakers on the oil spots. Approximately 80 gallons were vacuumed up, leaving 100 gallons to be absorbed with socks and pads. Foutz Construction was then called for the clean-up. They will remove all the contaminated soil and gravel and replaced it with clean soil and gravel. The contaminated soil will then be taken to a local land farm for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
