If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* <b>A produced water spill was discovered on 3/9/04. The spill resulted when produced water was pumped to a pipeline from the water tank on location, in order to use the water for drilling operations on another location. The threads had broken on the 2-to-1 swedge on the hose at the pump leading to the pipeline, resulting in the spill. All spilled fluids remained within the bermed area. A vacuum truck was called immediately and 160 BBL produced water was recovered from the spill site within the bermed area.</b>		
Describe Area Affected and Cleanup Action Taken.* <b>No water left the berm. A vacuum truck recovered 160 BBL of 165 BBL produced water spilled. Any remaining staining will be raked and excavated, if necessary. A final report will follow upon completion of any remediation activities.</b>		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
