NATURE OF RELEASE

Type of Release Produced Water	Volume of Release ~20 bbl	Volume Recovered ~20 bbl
Source of Release Produced Water Tank	Date and Hour of Occurrence 4/09/10 1:45 PM	Date and Hour of Discovery Same
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell-NMOCD & Kevin Schneider-BLM (email)	
By Whom? Myke Lane	Date and Hour 4/12/10 ~ 10:30 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. RCVD APR 13 '10	

If a Watercourse was Impacted, Describe Fully.

OIL CONS. DIV.

Describe Cause of Problem and Remedial Action Taken.

Well was put back on production following tank cleaning operations. The thief hatch was not completely secured and water leaked from the seam as the tank began to fill. The leak was identified by the field tech monitoring the well telemetry. Following verification, he tightened the bolts securing the thief hatch and stopped leakage. All water was contained in bermed area and immediately vacuumed up, and returned to the disposal system. The cleaning contractor has been notified of the incident and a request has been made that they monitor for leaks following cleaning to ensure tank integrity is reestablished.

Describe Area Affected and Cleanup Action Taken.

See actions taken above. As containment to be sterilized during production life of well, will reclaim when well P&A'd. No further action being taken at this time.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
