13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy requests approval to downhole commingle this well per NMOC Rule 19.15.12.11 C(2) in the Basin Dakota (71599) & the Angels Peak Gallup (2170) pools upon completion of the well. Pools are in the NMOC pre-approved pool combinations for downhole commingle in the San Juan Basin per Order R-11363. Please see attached spreadsheets for justification of proposed allocations.

Angels Peak Gallup	Water: 40%	Oil: 61%	Gas: 36%
Basin Dakota	Water: 60%	Oil: 39%	Gas: 64%

Ownership is common in both zones; therefore, there are no owners to notify of our intent to downhole commingle. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves and violation of correlative rights. NMOC was notified of our intent to downhole commingle via Form C-103 on 5/06/2011.
