13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion Oil & Gas returned the subject well to production on November 5, 2002. The well has been shut in for several years and would not flow when we first turned it on. We are attempting to restore the gas production by unloading the well with compression. It is currently venting to atmosphere, but we anticipate a return to normal operations withing the next few months.
