Re: Jaco 58 & Jaco 55-Y D-32-20N-9W

Dear Louis:

A recent field inspection of the referenced wells reveals several infractions of NMOCD rules and regulations. Specifically, oil must be skimmed from the pit so production water can evaporate. Pit is seeping water which is running out onto grassland and must be repaired or replaced. Pit fence is sagging and needs to be repaired. Lease is junky and oil stained. You have no well signs.

I will reinspect the lease in about one month. If remedial action has not been initiated, I will shut it in.

If you have any questions, please contact this office.

Yours truly,

A handwritten signature in cursive script, reading "Charles Gholson".

Charles Gholson
Deputy Oil & Gas Inspector
