March 19, 1975

Mr. Phil McGrath  
United States Geological Survey  
Farmington, New Mexico 87401

Dear Sir:

The eleven point program for Tesoro's Hanson No. 29, 6-17N-8W  
McKinley Co, New Mexico is as follows:

1. A map showing all existing and proposed roads in the area is attached.
2. The proposed access road will be of minimum width and approximately 150' long. Surface will be bladed native dirt and sand.
3. Lateral roads are shown on the map.
4. There are existing tank batteries and flowlines in the area.
5. Water for drilling the well will be obtained from water supply well.
6. All waste material will be placed in the reserve pit and covered with sufficient overburden.
7. & 8. No camps or airstrips will be associated with this well.
9. Location plat is attached.
10. Upon completion or abandonment, the location will be restored using the guidelines of the BLM.
11. The topography of the area is fairly flat with no unusual environment.

Yours truly,

*J. L. Tally*

J. L. Tally  
District Drilling Engineer
