Re: State #20, #13, #24, and #21 and #32

Dear Mr. Law:

The State #20, #13, and #24 each had an intent submitted in February 1984 for the wells to be worked over. Subsequent reports of the remedial work performed have not been sent to this office for approval. In order for me to approve the C-104's for transport change a detailed report of the above must be sent.

I am returning the C-104 on the #21, to be completed in section V. I also need a report of the work that was done in the conversion from the injection status to a producing well. A GOR test (C-116) is required for the well to receive an allowable.

A GOR test is not required on the #20, #13, or #24. If they are needing more allowable due to increased production after the workover, submitting one would be an advantage.

Enclosed is a copy of a letter I sent in November of 1984, for the State #32. As I have not received any response I am returning the sundry in question, unapproved. This must be resubmitted immediately. For your convenience I have enclosed a memorandum for you to follow.

If you have any questions, please call.

Sincerely,

A handwritten signature in cursive script that reads "Luanne Hisel".
