BC & D had proposed to recompleate subject well to the Gallup @ 1588'- 1598' in Nov. 1996. However, following further investigation it appears the Dakota may have additional pay behind pipe. BC & D proposes to test these Dakota sands prior to recompleting back to the Gallup. BC & D has currently tagged PBTD and perforated @ 2440' - 2636', stimulated and placed well on artificial lift to further evaluate the Dakota.
