One Well 14N-7W -

From Grants to North of San Mateo to resume water shut off at the Manvar #1. Finished going in hole with tubing to TD (1274). Set a cement plug 1274 - 1054 with 20 sacks class "A" cement. Perforated 4 1/2" casing 710 - 720' with 2 shots/ft. Had estimated fresh water flow of 30 gal./min. Had no effect on surface flow. Squeezed perfs. with 150 sacks of class "B" cement w/3 % CaCl₂. Shut off water flow. Woc 3 hours. Tagged top of cement at 564'. Perforated casing ~~410-400'~~ ^{430-430'} with 2 shots/ft. Got a heavy fresh water flow estimated at 100 - 200 gal./min. up casing. Flow was communicating with surface flow. Squeezed Bradenhead with 250 sacks of class "B" cement with 3% CaCl₂. Left water flow going up casing. Cement broke to surface after about 100 sacks had been pumped. Shut in Bradenhead. Cement at surface holding water flow. Left Bradenhead shut in and 4 1/2" casing flowing over night. Spent the night in Grants.

TYPE INSPECTION
PERFORMED

H - Housekeeping
 P - Plugging
 C - Plugging Cleanup
 T - Well Test
 R - Repair/Workover
 F - Waterflow
 M - Mishap or Spill
 W - Water Contamination
 O - Other

INSPECTION
CLASSIFICATION

U - Underground Injection Control - any inspection of or related to injection project, facility, or well or resulting from injection into any well. (SWD, 2ndry injection and production wells, water flows, or pressure tests, surface injection equipment, plugging, etc.)
 R - Inspections relating to Reclamation Fund Activity
 O - Other - Inspections not related to injection or the reclamation fund
 E - Indicates some form of enforcement action in the field. (show immediately below the letter U, R, or O)

NATURE OF SPECIFIC WELL
OR FACILITY INSPECTED

D - Drilling
 P - Production
 I - Injection
 C - Combined production/ injection operations
 S - SWD
 U - Underground Storage
 G - General Operation
 F - Facility or Location
 M - Meeting
 O - Other
